

Menu orders

Preparation

Each pair of students will need:

- access to a range of café and takeout menus that show the prices for breakfast, lunch, dinner, and beverage options

Each student will need:

- 1 copy of Enrichment 1

Activity

Organize students into pairs and distribute the resources. Explain that the students will take turns to act as the waiter and the customer. The customer chooses what they want for breakfast and the waiter adds the prices to calculate the total cost. Roles are alternated and the other student chooses their breakfast. Roles are alternated again for the lunch options and then again for the dinner options. Afterward, each student can calculate the total cost of all their meals for the day.
