Practice pages: Click here	Video Day: Click here	Math at home: Create a set of cards, numbering each one from 0 to 9. Take five cards and create an addition equation using decimal fractions. Make the total as close to 10 as possible (over or under). For example, with the digits 1, 2, 5, 6, and 9, an equation could be $9.6 + 0.521 = 10.121$. Take turns with your child to see who can get closer to 10 using the same cards.	Video Day: Students create a video	Math at home: Newsletter ideas
