

## Just Give Them the Facts- But with Understanding Rather than Gimmicks!

**James Burnett** 

Co-Founder Senior Author

# NUMBER FACT STRATEGIES

### ADDITION

- Count-on 1, 2 and 0
- Use doubles
- Make ten

### SUBTRACTION

Think addition

### MULTIPLICATION

- Use tens (5s)
- Make generalizations (1s and 0s)
- Use doubling (2s, 4s and 8s)
- Build up/down (9s and 6s)

### DIVISION

Think multiplication

# **TEACHING SEQUENCE**

- Introduce
- Reinforce
- Practice
- Extend

# **REINFORCE:** Count on 1 and 2

- Roll your number cubes and count on 1 or 2.
- Find your answer below.
- Write your numbers on the number cubes. Write the number fact.

# **ADDITION CHART**

+	0	1	2	3	4	5	6	7	8	9
0	0	1	2	3	4	5	6	7	8	9
1	1	2	3	4	5	6	7	8	9	10
2	2	3	4	5	6	7	8	9	10	11
3	3	4	5	6	7	8	9	10	11	12
4	4	5	6	7	8	9	10	11	12	13
5	5	6	7	8	9	10	11	12	13	14
6	6	7	8	9	10	11	12	13	14	15
7	7	8	9	10	11	12	13	14	15	16
8	8	9	10	11	12	13	14	15	16	17
9	9	10	11	12	13	14	15	16	17	18

- □ Count-on facts
- Use doubles facts
- □ Make ten facts

### **REINFORCE:** Double-add-1

11	19	13	15
13	9	17	19
17	11	15	9

**Cube:** 4, 5, 6, 7, 8, 9 (Same as previous game)

### **INTRODUCE:** Make Ten

ORIGO Education: Box of Facts (Addition and Subtraction)

## **REINFORCE:** Make Ten

- Roll your number cubes and write the fact below the example in the grid that will help you figure out the answer.
- Write the answer to both facts.

Cube A:8, 8, 8, 9, 9, 9Cube B:3, 4, 5, 5, 6, 7

# **Directions for the Games**

### Count on 1 or 2

#### Focus:

Adding 1 or 2 using the count on strategy

#### Materials:

Two number cubes configured as follows: Cube A: 4, 5, 6, 7, 8, 9 Cube B: 1, 1, 1, 2, 2, 2 Colored pencil or marker for each student in different colors Game board

#### **Directions:**

The player who completes the most equations is the winner.

#### How to Play:

Player 1 rolls, finds the matching equation with the matching sum and fills in the dice and equation on the game board in his/her color.

Next player rolls and fills in dice and equation in his/her color. If a player rolls a sum that is already filled, he/she misses a turn.

Play continues until board is filled or time runs out.

#### Example:

Gertrude rolls a numeral six and 2 dots. She says, Six count on 2 is seven, eight. I will fill in one of the equations with the sum of 8 and fill in the dice to match my roll.

### Doubles plus 1

#### Focus:

Using doubles facts to solve a doubles plus 1 equation

#### Materials:

Doubles add one game board Once cube showing the numerals 4, 5, 6, 7, 8, 9 Four counters per player, each player has a different color counter

#### **Directions:**

The player who places all four counters on the board first, wins.

#### How to Play:

First player rolls the number cube and doubles the number rolled, then adds one to it. Player claims the sum by covering it with a counter. If that sum is already covered, the player misses a turn. Other players have a turn.

#### Example:

Carla rolls a 7 and says, "I know that double 7 is 14, so 7 add 8, must be one more, that's 15."

For ideas on how to bring out the mathematics in this game, see Fundamentals Yellow, pp 56-57.

### MakeTen

#### Focus:

Reinforce the Bridge-to-Ten strategy for addition

#### Materials:

Two number cubes configured as follows: Cube A: 8, 8, 8, 9, 9, 9 Cube B: 3, 4, 5, 5, 6, 7 Colored pencil or marker for each student in different colors Game board

#### Directions:

The player who completes the most equations in their color is the winner. One player plays the left side of the board, one plays the right side. It is possible to add another player or two. In that case, each player would use the entire board and count the equations completed in his/her color at the end of the game.

#### How to Play:

First player rolls both cubes.

Player finds the tens fact that corresponds to the 8 or 9s fact that is rolled.

Player fills in the sum of the tens fact and the equation for the 8 or nines fact.

Next player has a turn.

Play continues until one player fills a side (in a two-player game), or the board is filled (if more than two are playing), or until time runs out.

Player with the most equations in his/her color is the winner.

#### Example:

Jorge rolls a 9 and a 5. He says, "I know that 9 is one away from ten, Nine add 5 has the same value as 10 add 4. That's 14. So I will fit in the space with 10 add 4 and add the equation 9 add 5 equals 14.
