Texas Essential Knowledge and Skills

Standard 1 – Mathematical process standards

The student uses mathematical processes to acquire and demonstrate mathematical understanding. The student is expected to:

- (A) apply mathematics to problems arising in everyday life, society, and the workplace;
- (B) use a problem-solving model that incorporates analyzing given information, formulating a plan or strategy, determining a solution, justifying the solution, and evaluating the problem-solving process and the reasonableness of the solution;
- (C) select tools, including real objects, manipulatives, paper and pencil, and technology as appropriate, and techniques, including mental math, estimation, and number sense as appropriate, to solve problems;
- (D) communicate mathematical ideas, reasoning, and their implications using multiple representations, including symbols, diagrams, graphs, and language as appropriate;
- (E) create and use representations to organize, record, and communicate mathematical ideas;
- (F) analyze mathematical relationships to connect and communicate mathematical ideas; and
- (G) display, explain, and justify mathematical ideas and arguments using precise mathematical language in written or oral communication.

2NO

Standard 2 – Number and Operations (2NO)

The student applies mathematical process standards to represent, compare, and order positive rational numbers and understand relationships as related to place value.

3NO

Standard 3 – Number and Operations (3NO)

The student applies mathematical process standards to develop and use strategies and methods for positive rational number computations in order to solve problems with efficiency and accuracy.

4AR

Standard 4 – Algebraic Reasoning (4AR)

The student applies mathematical process standards to develop concepts of expressions and equations.

7GM

Standard 7 – Geometry and Measurement (7GM)

The student applies mathematical process standards to select appropriate units, strategies, and tools to solve problems involving measurement. The student is expected to solve problems by calculating conversions within a measurement system, customary or metric.

9DA

Standard 9 – Data Analysis (9DA)

The student applies mathematical process standards to solve problems by collecting, organizing, displaying, and interpreting data.

Note to Teachers: *The Think Tank* questions have been correlated to the Grade Level Standards in 5th Grade. Please refer to the TEKS and the grade level student expectations. This correlation is only a starting point in your instructional planning.
